JARDIM MULTISSENSORIAL DAS ENERGIAS

ESCARPAS SANTOS NICOLAU – SETÚBAL

MULTI-SENSORY ENERGY GARDEN

The Multi-sensory Energy Garden is an exhibition area accessible to everyone that offers an interactive journey through the different renewable energy sources available on planet Earth, based on experimentation and sensory stimulation.
Along the suggested tour circuit, there are six stations, each one focused on a specific renewable energy: Biomass, Geothermal Energy, Marine Energy, Solar Energy, Water Energy and Wind Energy.
It is also possible to enjoy rest areas, an aromatic plant garden and the refreshing atmosphere created by the water that runs across the garden.
At the end of this journey, you can visit the Multimedia Room, where you'll find more information about Energy Efficiency and Renewable Energy Sources.

For more information and/or to schedule a guided tour, please visit the ENA headquarters or send us an e-mail to jmenergias@ena.com.pt
